*“Seeking Change in the Lives of the Disadvantaged”*

The **Association for Social and Health Advancement** (ASHA) is a non-profit, non-political, non-government organization which, since its inception in 1997, has been working to improve the socio-economic and health status of disadvantaged communities.

**Mission:**

The organization strives to assist disadvantaged communities in improving their life conditions. Capacity building interventions are carried out in socioeconomic and health sectors.

## OUR VISION OF A HEALTHY COMMUNITY

### *In a healthy community...*

- *Primary needs are fulfilled*
- *Health care services are available and accessible*
- *There is 100% literacy*
- *People have sustainable livelihoods*
- *Social, cultural and religious activities are accessible*
- *There is an eco-friendly environment*
- *Social security is assured*
- *Human rights are respected*
- *People accept their responsibilities and duties*
- *There is peaceful co-existence and harmony*
- *There is good governance*
- *There is no gender bias*

### **Factors that determine health:**

- ❖ Sufficient, nutritious food
- ❖ Sufficient income
- ❖ Planned families
- ❖ Good hygiene
- ❖ Sufficient, potable water
- ❖ Shelter
- ❖ Clothing
- ❖ Education and literacy
- ❖ Eco-friendly, sustainable environment
- ❖ Social support and protection (love, belonging, family)
- ❖ Good work environment
- ❖ Facilities for sports, games, cultural activities
- ❖ Health care facilities and services
- ❖ Community participation
- ❖ Good health practices
- ❖ Healthy child development
- ❖ Peace and security
- ❖ Cultural practices and beliefs
- ❖ Gender

## THE PURPOSE OF COMMUNITY HEALTH IMPACT ASSESSMENT

*Community health impact assessment* is a way to bring the health concerns of the community forward in discussions of public policy.

- ◆ It allows us to estimate the effect that a particular activity (a policy, program, project or service) will have on the health of the community.
- ◆ It suggests things we can do to maximize the benefits (the positive effects) and minimize the harm (the negative effects) of that activity.

Community health impact assessment is *not* a substitute for decision-making but it is one tool we can use to guide thinking and discussion.

Most policies or programs have both positive and negative effects on a given population (a geographic community or a specific “community” of people within that geographic area). For this reason, community health impact assessment is *not* meant to determine if a policy is “right” or “wrong”. Rather, it helps to identify how a particular activity will enhance or diminish the many factors that the community considers to be important for its overall health.

This *Community Health Impact Assessment Tool* is designed to assist groups and organizations in thinking about what it takes to make and keep our community healthy.

The factors listed in the *Assessment Worksheet* (page 5) are based on the priorities identified by an ASHA workshop that were held May 15-16 and May 19, 2003 – 2003 in Kolkata.

The *Vision of a Healthy Community* (page 2) reflects what we consider to be the fundamental principles against which various programs and policies can be “assessed”.

“**Health**” in our community is broadly defined as being inclusive of physical, mental, social and spiritual well being. It is determined by many factors outside as well as inside the health care system.

# HOW TO USE THIS TOOL

See the *Facilitator's Guide* on page 17 for more detailed tips and suggestions.

## Determine what to assess

*Community health impact assessment* should be used to assess major policies, programs, projects or services that will have a significant effect on the overall health of the geographic community (or a particular “community” within the geographic area).

## Involve the right people

This *community health impact assessment tool* is designed for group discussion, not as an individual activity.

It can be used by various decision-making groups, groups that represent people within the community, or groups that are composed of members of the community. Where possible, it is best to include those who will be most affected by the proposed policy or program that is being assessed.

## Prepare for the discussion

Gather all of the information available about the proposed activity.

Before you begin, please read the sections:

- *Our Vision of a Healthy Community* (page 2)
- *Factors Determining Health* (page 2).
- *The Purpose of Community Health Impact Assessment* (page 3)

## Give yourself time

It will take approximately 2 – 2 ½ hours of group discussion to work through the factors in the *Assessment Worksheet* and to complete the *Summary Worksheet*. Be sure to set aside enough time so that all opinions are heard and valued.

## Facilitate discussion

- Every factor in the *Assessment Worksheet* is important. Be sure to invite comment on each one of the factors.
- The impact on some of the factors will be negligible or not applicable. Simply check the “NO/NEUTRAL” column and move on.
- If the discussion gets bogged down on some of the factors, encourage the group to “flag” that issue and come back to it when completing the *Summary Worksheet*.
- Respect different opinions. If the group cannot agree on an impact, check the “NEED MORE INFO” box or make a notation in the “COMMENTS” column.

## KEEP IN MIND:

This tool is designed to assess the *impact* of an activity on all of the factors affecting community health, not to determine if a proposed activity is “right” or “wrong”. Encourage people to make an honest and open-minded assessment.

## STEP 1: ASSESSMENT WORKSHEET

### *Primary needs are fulfilled*

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
• Everyone has enough to eat					
• There is adequate, clean water					
• There is clean, safe housing for everyone					
• Everyone has adequate clothing					
•					

### *Health care services are available and accessible*

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
• There are properly equipped health centers					
• Equipment is in functioning condition					
• There is trained health staff, with good behaviour					
• Medicines are available and affordable					

***Health care services are available and accessible***

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
• There is a good linkage between government health staff and other village resource persons (i.e., THP, TBA, CHG, VHV, etc.)					
• People are aware of the services available					
• There are effective awareness programs					
• Regular outreach programs are provided					
• The health workers stay within the communities they serve					
• There are well functioning advisory committees with active participation of female members					

***There is 100% literacy***

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
• There is an adequate number of schools, with good infrastructure and environment					
• Both genders have equal access to schools					
• There is a sufficient number of good quality, trained teachers					
• There are good recreation facilities in the schools					
• Teaching materials are attractive and of good quality					

***There is 100% literacy***

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
• Effective teaching methods are used					
• Non-formal education services are provided					
• There are well-functioning Village Education Committees					

***People have sustainable livelihoods***

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
• There are opportunities for gainful employment throughout the year, i.e., agriculture (farm and off-farm), non-agriculture (industry, small cottage industries, etc.)					
• Savings at the family level are encouraged					
• Income is used to promote the health and well-being of families					
• People have access to consumer articles that contribute to over-all well-being (i.e., radios, TV, cycles, carts, etc.)					
• In rural communities, people possess livestock					
• There is access to marketing facilities					
• There is access to affordable credit					

***People have sustainable livelihoods***

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
<ul style="list-style-type: none"> <li>There is access to vocational training</li> </ul>					

***Social, cultural and religious activities are accessible***

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
<ul style="list-style-type: none"> <li>There are opportunities for, and participation in, games, cultural activities, religious festivals, etc.</li> </ul>					
<ul style="list-style-type: none"> <li>Space for gathering is available (e.g., community centers)</li> </ul>					
<ul style="list-style-type: none"> <li>Playgrounds / open spaces are available</li> </ul>					
<ul style="list-style-type: none"> <li>There is access to public libraries</li> </ul>					
<ul style="list-style-type: none"> <li>There is access to temples, churches, mosques, etc.</li> </ul>					
<ul style="list-style-type: none"> <li>Traditional art forms are preserved and encouraged</li> </ul>					

***There is an eco-friendly environment***

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
<ul style="list-style-type: none"> <li>Industrial waste is properly disposed</li> </ul>					
<ul style="list-style-type: none"> <li>There is reduction and control of all forms of air pollution (indoor and outdoor)</li> </ul>					

***There is an eco-friendly environment***

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
• There is reduction and control of all forms of noise pollution (indoor and outdoor)					
• There is reduction and control of all forms of water pollution					
• Clean water sources are protected and preserved					
• Proper sanitation, drainage and waste disposal is ensured					
• Adequate green coverage is ensured in order to avoid deforestation and minimize soil erosion					
• There is optimal utilization of natural resources					

***Social security is assured***

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
• There is adequate allocation of budgetary resources for the development of necessary infrastructure at the community level					
• Job security is assured					
• People have adequate insurance in risk areas (i.e., medical, agriculture, life, etc.)					
• The well-being of under-privileged groups is protected					
• There is effective implementation of relief and rehabilitation measures					

***Social security is assured***

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
• There is a proper public distribution system					
• There are pension schemes for citizens					

***Human rights are respected***

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
• The rights of the weaker section of the community are respected					
• The rights of different groups within communities are respected					
• There is respect for the democratic values and practices as expressed in the Constitution					
• There is freedom to exercise personal rights and privileges without offending the feelings and sentiments of others					
• There is no discrimination on the basis of religion, caste, sex, ethnicity, etc.					

***People accept their responsibilities and duties***

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
• Active groups exist at the community level (i.e., Mahila Samity, youth clubs, self-help groups, etc.)					

***People accept their responsibilities and duties***

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
• There is participation in Gram Samsad meetings					
• People accept responsibilities and duties at the family level					

***There is peaceful co-existence and harmony***

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
• There is intra- and inter-community cooperation and support					
• There is mutual respect and trust for each other's sentiments and emotions					
• There is social interaction among households within the community					
• There is active intra-community participation in cultural and other group activities					
• There is fair and just settlement of problems and disputes					
• There is respect and tolerance for different faiths and beliefs					

***There is good governance***

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
• There is community participation in local self-government (Panchayet)					

***There is good governance***

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
• Adequate infrastructure is created and maintained (i.e., roads, electricity, public transport, telephones, etc.)					
• There is decentralization of power and responsibilities at both the policy-making and execution level					
• There is efficient delivery of services, ensuring transparency and accountability					
• There is inter-sectoral cooperation / collaboration					
• There are strong democratic institutions					
• There are strong civil rights bodies and activists					

***There is no gender bias***

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
• Women participate in all aspects of development activities					
• Women have the right to make decisions in all spheres and participate in the implementation (i.e., family, community, occupation, etc.)					
• There is equal representation in government bodies					
• Women have an equal right to express opinions					
• Women's suggestions and input are respected					

***There is no gender bias***

Will _____ have an impact on the following areas:	YES		NO or Neutral	Need MORE INFO	COMMENTS
	Positive	Negative			
• There are equal rights to property					
• There is no discrimination in terms of occupation					
• Women have equal opportunities to undertake skills training for capacity-building					
• There is equal wage for equal work					
• There is no sexual harassment in the work place					
• There is equal representation in family planning programs					
• There is no female infanticide or foeticide					
• There is no violence against women					
• There is no discrimination in terms of distribution of food in the family					
• Women have increased control over resources					

➤ ***Next step:***      ***Summary Worksheet***

## STEP 2: SUMMARY WORKSHEET

Now that you have assessed the impact that the proposed activity will have on the many factors affecting the health of the community, it is time to develop a summary and identify the actions that need to be taken.

- ◆ Carefully consider the results of your reflections in each section of the *Assessment Worksheet*. Try to **develop a statement of the “overall impact”** for that section.

Keep in mind that this is not simply a “tally” of the results, since one or more negative (or positive) impacts may outweigh a number of positive (or negative) impacts. For example, your statement might be something like “*Generally positive but special attention needs to be paid to...*”.

- **Identify any actions** you need to take in order to complete the community health impact assessment. Some examples of actions include:

- Seeking more information (from where? by when? etc.)
- Consulting with other groups
- Returning to particular points in the Assessment Worksheet at a later date

Page	CONSIDERATION	OVERALL IMPACT	ACTION REQUIRED
<i>In a healthy community:</i>			
	<b>Primary needs are fulfilled</b>		
	<b>Health care services are available and accessible</b>		
	<b>There is 100% literacy</b>		
	<b>People have sustainable livelihoods</b>		

Page	CONSIDERATION	OVERALL IMPACT	ACTION REQUIRED
	<b>Social, cultural and religious activities are accessible</b>		
	<b>There is an eco-friendly environment</b>		
	<b>Social security is assured</b>		
	<b>Human rights are respected</b>		
	<b>People accept their responsibilities and duties</b>		
	<b>There is peaceful co-existence and harmony</b>		
	<b>There is good governance</b>		
	<b>There is no gender bias</b>		

## NEXT STEPS

The community health impact assessment is not complete until you have developed a plan for the “next steps” that your group will take. You may wish to work on this section at a subsequent meeting.

Use this planning grid to help keep track of the various tasks and strategies that emerge from the group’s discussion.

Some of the “next steps” that can be included in the grid are:

- Seeking more information (from where? by when? etc.). This information can be extracted from the “Action Required” column of the Summary Worksheet.
- Presenting your concerns to another group or decision-making body (what group? how? etc.)
- Inviting further discussion that involves the affected groups

Next Step (What)	Who to Involve	When	Person Responsible	Report Back (by when)

# FACILITATOR'S GUIDE

Here are some additional ideas, suggestions and tips to assist you and your group in using the Community Health Impact Assessment Tool (CHIAT).

Since every group has its own style of discussion – and every facilitator has her/his own style of helping a group accomplish its task – you should feel free to adapt these suggestions to meet the needs of the people you are working with.

## How the CHIAT works

The CHIAT provides a systematic way to look at the effect (impact) that proposed policies or programs will have on the overall health and well-being of the community. It is based on a “Vision of a Healthy Community” (page 2) that reflects our community’s values and our understanding of the factors that determine health (page 2).

There are four basic steps in using the CHIAT:

1. **Choose what you want to assess.** Since we understand health to be inclusive of physical, mental, social and spiritual well-being, the policies/programs that can be assessed using the CHIAT are not limited to medical or “health services”.

Some of the things that can be assessed include:

- Government policies (municipal, provincial, or federal)
- Programs or services offered by governments, institutions; community organizations
- Major infrastructure projects

2. **Prepare for the meeting.** Both the group and the facilitator should do some advance preparation to ensure the smooth and efficient flow of the community health impact assessment.

## 3. Facilitate the CHIAT discussion

**3.1 Work through the Assessment Worksheet.** Indicate whether or not the policy/program will have an impact on each of the factors that are listed. Will it be a positive or negative impact? Will it have no significant impact? Do you need more information in order to make an assessment? This is also where you will make notes of any special considerations that arise in the discussion.

**3.2 Complete the Summary Worksheet.** Develop a statement that captures the “overall impact” the policy/program will have on each section of the Assessment Worksheet. This is where you will begin to identify how to maximize the benefits (the positive impacts) and minimize the harm (the negative impacts) of the policy/program that you are assessing.

4. **Identify the “Next Steps” that you need to take.** What will you do with your impact assessment? How will it affect your group’s decision-making? What further information or research is required?

Detailed suggestions are contained in the following pages.

## 1. Choose what you want to assess

### Choose the right issue:

- **Big, not small.** Use the CHIAT for deliberations about *major* policies, programs or services that will have an impact on the community. The CHIAT is quite detailed and requires a discussion time of at least two hours so you will probably only use it once every year or two.
- **Specific, not general.** Assess the impact of something concrete – such as a specific policy or program – not a broad or general idea. For example:

General	Specific
Cutbacks to education funding	No new schools or no new teachers
Government improving infrastructure	Highway to be widened
Restructuring of the health care system	Implementation of hospital user fees
Economic development	SGSY scheme

### Choose the right time to do the assessment

The CHIAT can be used at any time during the planning, implementation or evaluation of a program or policy. However, it is most effective if it is used **before** an activity takes place.

Since the CHIAT allows us to identify both the positive and negative impacts that a policy or program will have, it is particularly useful in the *early planning stages* of an activity.

This allows for changes to be made in the policy or project in order to *maximize the benefits* and *minimize the harm* that could be caused.

If the CHIAT is used **during** the implementation of a policy, program or service (usually something long-term), it can help to identify positive and negative impacts and encourage corrective action to be taken.

When the CHIAT is used **after** a project is completed, it can be used as a source of information to complement a formal evaluation.

### Formulate the question

This step should involve the whole group and take place *several weeks in advance* of the actual CHIAT discussion.

The Assessment Worksheet is built around the question: **Will** \_\_\_ [the name of the policy/program] \_\_\_ **have an impact on the following areas?** This is followed by a list of “factors” for consideration by the group.

Once you have chosen the policy or program you will assess, you need to put it in the form of the question above. The question should:

- Be short, clear and use plain language
- Name a concrete policy or program, not a general idea
- Be accepted and understood by the whole group

## 2. Prepare for the meeting

### Group preparation

- **Background reading.** Once the group has agreed on what to assess, some background information on the particular program or policy should be provided so that

people will come to the CHIAT discussion with some basic information and knowledge about the topic.

Be clear that the group members are not expected to be experts on the topic. They simply require some basic facts and familiarity with the issue that will be discussed.

- **Vision and purpose.** Provide each group member with a copy of *Our Vision of a Healthy Community* (page 2), the *Purpose of Community Health Impact Assessment* (page 3), and the *Broad Determinants of Health* (page 4). Invite them to reflect on these before the meeting.

### ***Facilitator preparation***

Here is checklist of some things the facilitator should do in advance of the meeting:

- **Read through the entire CHIAT** so that you are familiar with the contents and the flow of the material.
- Pay particular attention to the section *Our Vision of a Healthy Community* (page 2) so that you are able to explain it to others in the group.
- Assist the group in formulating the appropriate question for assessment (see page 18).
- See that the group has the necessary background material about the issue being assessed – and be sure to read the material yourself.
- Make sure that people are aware of the date, time and location of the meeting. Be clear that the discussion will take a *minimum* of two hours.
- Ensure that you have one copy of the CHIAT for each person in the group.

### ***3. Facilitate the CHIAT discussion***

As facilitator of the community health impact assessment, your role is to guide the group through the various steps in the

process. The following pages describe some tips and ideas for how to carry out your task.

### ***Introduce the process***

- Begin with a brief reminder of the purpose of community health impact assessment (page 3). Take a few minutes to answer questions and clarify expectations.
- Describe the process that will be followed: a detailed assessment of the policy/program, a summary and naming of actions required, and a discussion of next steps that need to be taken.
- Clarify important terms:

*Our Vision of a Healthy Community.* Remind the group that the assessment is based on the Vision of a Healthy Community that was developed by the Antigonish Town and County Community Health Board.

Take 10 or 15 minutes to walk through the main points in the Vision and invite people to offer comments, questions and/or clarifications. Group members do not have to *agree* with every point but they should have a clear *understanding* of what is meant.

***Use of the term “community”.*** Before the group begins, it is helpful to clarify how the term “community” is being defined *for the purpose of this assessment*. Depending on the nature of the group, “community” can refer to all of the people within a geographic location (e.g., a village, town, county, etc.); a specific group of people within a geographic location (e.g., youth, people with special needs, etc.); and so on.

It does not matter how the group defines “community” as long as the whole group shares a common understanding.

### 3.1 Work through the Assessment Worksheet

The Assessment Worksheet presents a detailed list of “factors” that relate to the various parts of the Vision of a Healthy Community.

#### *The basic process:*

- At the beginning of *each section* in the worksheet, group members fill in the blank space in the question “*Will \_\_\_\_\_ have an impact on ...?*” with the name of the policy or program that is being assessed.
- The facilitator then reads out each factor (pausing for discussion between each), beginning with the statement: “*Will [the policy or program] have an impact on...[name the factor]?*”
- The group is asked to offer an opinion about the impact the policy / program will have on that factor (**Yes** or **No/neutral**), checking the appropriate box. If the group does not have enough information to make an informed choice, they should check the box “**Need more information**”.
- If the group members feel that there will be an impact (**Yes**), they should then discuss whether or not the impact will be **Positive** or **Negative**.
- The “Comments” section should be used to note special considerations, things to pay attention to, specific questions that arise, and so
- The facilitator then moves the group on to consider the next factor, repeating the question “*Will [the policy or program] have an impact on...[name the factor]?*”

#### *Facilitation suggestions*

Here are some things to consider when working through the Assessment Worksheet.

- Before and during the assessment, the facilitator should remind the group members that they are assessing the impact that a **specific policy or program** will have on the community, not the impact of what “might” happen as a future result of the program or policy. For example, you should assess the impact of *introducing a bylaw banning smoking in public places*, not the impact of people “possibly” quitting smoking as a result of such a bylaw.
- Try to keep the group focused on the particular factor under discussion at any given time.
- Ask for an indication of the main impact on each factor (e.g., “mostly positive”; “generally no impact”; “mainly negative”). The goal is to determine the overall impact on a given community. Exceptions and special considerations should be noted in the “Comments” section.
- If the group cannot agree on an impact (*Yes* or *No*, *Positive* or *Negative*), suggest that this is an example of something that requires more information. You can also suggest that the group move on and return to this point after considering other factors.
- In some cases, the factor listed is simply not applicable to the policy or program being assessed. Groups have a tendency to search for an impact even where one does not exist. If this happens, ask the group to check the *No/Neutral* box and move on.
- It may happen that a group finds both Positive and Negative impacts for the same factor. Take time for a bit of discussion to see if there is a **predominant** impact (and

note the exceptions in the “Comments” section). If the group cannot agree, ask them to check the box *Need more information* and move on.

- Pay close attention to the time. It is important to complete the Assessment Worksheet in one session. If necessary, you can come back to the Summary Worksheet at another time (but do come back).

### 3.2 Complete the Summary Worksheet

It is *absolutely essential* that the group complete the Summary Worksheet as this is where you begin to identify how to maximize the benefits and minimize the harm that a policy or program is likely to have.

#### *Facilitation suggestions*

- Invite the group to review the results of their reflections from each section of the Assessment Worksheet, paying particular attention to the notes they have made in the “Comments” column.
- Remind people that this is not simply a “tally” of the results, since one or more negative (or positive) impacts may outweigh a number of positive (or negative) impacts.
- For each “consideration” in the Summary Worksheet, the group should **develop a statement of the “overall impact”**.

The statement should include any of the special considerations that were noted in the “Comments” section of the Assessment Worksheet since this is where you begin to identify how to maximize the positive aspects of the program/policy and minimize

the harm or negative effects. For example, the statement might be something like

*“Generally positive but special attention needs to be paid to...[e.g., the effect this will have on local businesses **or** the problems this will create for people with limited transportation **or** the need for additional training for employees, etc.”]*

You may find it helpful to divide people into sub-groups to develop a statement that can be brought back to the whole group.

- Ask the group to **identify any actions** it needs to take such as seeking more information, consulting with other groups, and so on.

### 4. Identify the “Next Steps”

The community health impact assessment is not complete until the group has developed a plan for its “next steps”. You may wish to work on this section at a subsequent meeting.

Page 16 of the CHIAT offers a simple grid that the group can complete in order to organize follow-up activities.

Some of the “next steps” that can be included in the grid are:

- Seeking more information (from where? by when? etc.). This information can be extracted from the “Action Required” column of the Summary Worksheet.
- Presenting your concerns to another group or decision-making body (what group? how? etc.)
- Inviting further discussion that involves the affected groups

**You have successfully completed a community health impact assessment. Congratulations on a job well done!**
